Synchronize Files and Folders

FreeFileSync is a folder comparison and synchronization software that creates and manages backup copies of all your important files. Instead of copying every file every time, FreeFileSync determines the differences between a source and a target folder and transfers only the minimum amount of data needed. FreeFileSync is Open Source software, available for Windows, macOS, and Linux. Download

User Reviews

Brilliant program, been searching for years for something like this, only sorry it's taken me so long to discover!

— Trevor Learoyd

Thanks for continuing to develop this fantastic piece of software. I use it multiple times a week and it performs flawlessly.

— Nathan Rudyk

Awesome and reliable sync software you can count on. I've been using it for more than 3 years now. Best I have used so far for syncing.

— Peri2

One of the best, if not THE best. Very powerful and fully customizable through scripts. Thanks for creating it and making it free and open source.
